the truth hurts. heals.

mary tocco

investigative reporter • vaccine researcher • speaker
Mary Tocco competed in a national pageant and was crowned "America's Outstanding Mom 2013" on July 28th in Lake George, New York.

Platform: HEART FOR AUTISM

Before Mary became a mother in 1980, she began investigating vaccines and immunity. She and her ex-husband, Dr. Sam Tocco, decided that natural immunity was the only way to ensure health. They did not vaccinate their five children and raised them with a natural approach. During the 1980s, Mary observed that chronic illness was increasingly becoming common among children. Based on her research, she suspected that vaccines played a major role in their declining health. She intensified her research and in 1994, as the Director of Vaccine Research and Education for Michigan Opposing Mandatory Vaccines, she testified before the Michigan Health Policy Committee opposing a bill that would remove the philosophical vaccine exemption in her state. The bill was defeated, and Mary began an extensive national educational program. Mary feels that parents need full disclosure about vaccine ingredients, known risks, and healthy alternatives in order to make responsible decisions. Ultimately, parents must always have the right to make vaccine choices for their family.

In 2005, Mary launched her website, www.Childhoodshots.com and was soon recognized as a "vaccine expert." She has been the keynote speaker at countless conferences and has even hosted seminars herself. Over the years, Mary has also been a radio guest on stations crossing the country, discussing the vaccine controversy. In 2006, Mary produced an educational DVD, "Are Vaccines Safe?", that has been viewed by over 250,000 people worldwide and is considered the #1 educational vaccine DVD.

Mary has compiled extensive research documenting the explosion of pediatric chronic illnesses including autism and the correlation with the ever-expanding vaccine schedule. Almost twenty years of investigation has led her to be convinced that autism is a man-made health crisis, which is now affecting 1 in 38 boys, 1 in 50 children nation-wide. Many refer to Mary as the “Erin Brokovich” of the vaccine industry because she is working tirelessly to hold those accountable who have been profiting from vaccine revenues at the health expense of children.
Mary Tocco has been passionately encouraging mothers for most of her adult life and believes that being a mother is one of the most important responsibilities of womanhood. Having raised five children herself and having five grandchildren now, she understands the challenges facing modern-day moms. In January 2013, Mary's eldest daughter nominated her to be a contestant in the 'America's Outstanding Mom' pageant and Mary won the Michigan title. She then traveled to New York to compete in the pageant as a finalist and was honored to win the pageant title in July 2013.

Mary is very concerned about the health of American children and the catastrophic rise of autism spectrum disorders, which now affects 1 in 38 boys and 1% of children overall. She has been involved in autism research for the last fifteen years and for this reason, her platform for the 'America's Outstanding Mom Pageant 2013' is Heart For Autism, a 501C-3 nonprofit organization. Mary is concerned about the way that autism affects the entire family unit. According to the National Autism Association, families affected by autism face astronomical emotional and financial stress, creating hardship unlike anything our country has ever witnessed before. Sadly, the divorce rate is estimated to be near 80% for these families. Thousands of single parents are raising children with immense needs for health care and therapy which is often not covered by insurance. In addition, these parents may also become emotionally bankrupt from the daily stress and lack of support. As the numbers of children with this developmental disability continue to skyrocket, Mary considers this a leading health crisis in the United States. Mary is delighted and honored to use her reign as "America's Outstanding Mom 2013" to increase autism awareness and to help create the financial support for families in need across the country. To learn more about Mary's charity of choice, and to donate please visit www.HeartForAutism.com.

Mary’s incredible mission to change the world of autism is made possible in part by an amazing company who shares her passion for natural health and wellness, AVENA Originals. Over the years Mary has been careful to give her public endorsement to very few companies, and only those who represent her dedication to the highest levels of quality and purity. AVENA’s line of health-supporting products are guaranteed to be pure and are made with superior ingredients. With these products, people can regain and support their health from the inside out! AVENA’s motto is: Eliminate Toxins, Empower Healing and Enhance Nutrition. As Mary fulfills her duties as 2013’s "America's Outstanding Mom", a portion of every AVENA sale will be donated to Heart For Autism.

"Mary Tocco delivers one of the most compelling presentations on the dangers of vaccines. Mary tells her story beginning with her decision to resist vaccinating her children through to the process of research and discovery supporting her decision. Mary’s 30 years of vaccine research and activism has resulted into a 2-hour, 24-minute presentation that combines history, experience, logic, science and corporate-neutral compassion into a lesson that parents and professionals alike can understand. Plus, Mary is so lovely and her voice so pleasingly strong that it is effortless and enjoyable to follow her reasoning into adopting an informed opinion regarding the safety and efficacy of vaccines."

Ingri Cassel
Vaccine Liberation

Mary’s experience and deep knowledge of the vaccination subject is hard to find. She has the ability to discuss this controversial topic with people gracefully while still getting the point across. She talks with people from her heart and at their level while bringing them up the ladder of understanding. We were fortunate to have her speak at our event and thankful for the impact this had on our community.

Dr. Nathan Conroy
The Chiropractic People

"I encourage every parent to carefully examine this information so that they may protect their children. I wish I had this information years ago."

Phillip DeMio MD, DAN! Physician
President of the American Medical Autism Board

"Took my daughter to see you in Rochester, MI last winter. Excellent presentation, thorough research and entertaining. Highly recommend!"

Diane Cee
Rochester, MI

"I highly recommend Mary Tocco as a speaker, I attended a class in MO and thought Mary was very well educated and an excellent speaker. Very informative and life changing!"

Amy Miller-Hoffman
Kansas

Our Fellowship hosted Mary Tocco’s live presentation on “Vaccine Risks, Rights and Responsibility” in May of 2013. We were quite please by the turn out and response to Mary’s information! Being in a rural location (Howe, IN.) we weren’t sure how far folks would travel. Some people drove several hours to hear her speak from a nearby state. The question / answer time, the numerous comments and interest in the materials Mary presented were all very positive. We would not hesitate to have her back in the future! Mary’s presentation was VERY informative and information that people need to hear! Very well laid out and well supported by documentation, references and other professionals in the field of medicine. I would highly recommend Mary Tocco to speak at your event!

Pastor Ron Hyre
Messiah Fellowship

Our local chapter of the “Weston A Price Foundation”, Nourishing the Lakeshore of West Michigan, hosted an event this summer (2013) with Mary Tocco as our key note speaker. We were able to draw over 200 attendees from as far as 3 hours away and we received rave reviews after the event. Mary’s talk was so informative, engaging and truly eye-opening for the parents and medical professionals who made up the majority of the audience. Many said it was life- changing as they expressed their gratitude for the education they gained from Mary’s presentation. I highly recommend Mary Tocco as a speaker on this crucial issue of vaccines and natural child healthcare.

Lisa Middlecamp-Lowder
Spring Lake, MI

“I attended a lecture by Mary Tocco for the first time last fall. So much information was provided by Mary that it was unreal. As an independent researcher myself of over 20 years, I still learned many new things. I would highly recommend Mary’s lectures for anyone who is looking for information about vaccines. Whether you are a newbie to the arena or a veteran, there is something for everyone.”

Lauri Harvey Boone
Iowa
Being part of the solution has always been Mary Tocco’s mission. For the last 20 years Mary has been an activist, spreading her message as a guest on dozens of radio programs yearly, and traveling the USA and Canada educating parents and doctors at public lectures and conferences. Since 2009 Mary has also hosted her own radio show, *Healing Our World*, which has aired over 250 programs. She keeps her listening audience intrigued and educated as she interviews physicians, researchers, scientists and authors who all share a similar goal: to bring natural, cutting-edge health solutions to America. Mary’s listeners benefit from knowledge shared by some of the leading natural physicians who are successfully healing acute and chronic illnesses with non-invasive methods.

Mary has dedicated many years as a volunteer working on community projects and is a member of several boards:

**Michigan Opposing Mandatory Vaccines (MOM), Director of Research and Education**: Mary holds the foundational belief that all Americans deserve freedom in health care. Parents should always have the right to voluntarily accept or reject medical procedures for themselves and for their children. For this reason Mary’s first act of public service was to testify on behalf of Michigan parents to help defeat a bill which would have eliminated the philosophical exemption in Michigan. Mary’s years of dedicated research and her courage to stand up for Michigan parents lead to her appointment as the Director of Vaccine Research and Education for MOM. For more information visit www.momvaccines.org.

**American Chiropractic Autism Board (ACAB), Adviser**: The ACAB is comprised of a diverse group of physicians, experts and advisers who represent the many different facets of autism recovery. They commit to staying abreast of all the latest, innovative treatment methods for those suffering with autism and related illnesses. This board was influential in creating the curriculum for the *Hope for Autism Conferences* the BioNutritional Care training program for doctors.

**Hope For Autism, Co-founder**: Autism was first described in the 1930’s but for decades was very rare and misunderstood. Doctors once considered autism a mental illness. Almost overnight, autism has become an epidemic. Hope For Autism was created to fulfill three great needs for the autism community: Prevention, Education and Recovery. Mary and her daughter, Dr. Renee Hunter, have successfully held numerous physician and parent training conferences. Mary has personally spent thousands of hours supporting, coaching and directing parents who have children affected by autism. For more information visit www.HopeForAutism.us.

**Heart For Autism, Vice President**: One of the largest challenges facing parents of a child with autism is the financial pressure. Often children with autism require intensive healthcare and therapies, much of which is not covered by insurance. Heart For Autism is a 501c3 charitable organization dedicated to raising funds for children so they can have the best chance for the highest quality of life. Mary is on a mission to make this non-profit a success that will change lives across the country. For more information, visit www.HeartForAutism.com.

**World Association of Vaccine Education (WAVE), Board Member**: Mary believes that parents need to make fully informed vaccine decisions based on full disclosure. She is a contributor and board member of WAVE. We live in the age of information and WAVE is a fully referenced research website for people seeking detailed information about vaccines. www.NoVaccine.com
Mary’s evidence-based, jaw-dropping presentation will captivate and educate the audience to eliminate the confusion surrounding the vaccine choice. This talk covers foundational vaccine issues as well as the latest, cutting-edge vaccine research. Mary discusses:

- The difference between natural immunity and vaccine-induced immune suppression
- The autism crisis
- The connection between vaccines and cancer
- Vaccine production and toxic ingredients
- Vaccine ineffectiveness and outbreaks of illnesses
- The explosion of pediatric chronic illness and the scientific ties to vaccination
- Specific vaccines: Gardasil, Influenza, Rotavirus, Hepatitis B, DPT, MMR and more
- How parents and healthcare workers can protect their rights

This 3-4 hour, powerful presentation is packed with vital information that all people need. Her talk is fully referenced with the latest scientific research validating the concerns with vaccinations. This presentation is appropriate for parents, doctors, teachers, pastors, healthcare workers and other concerned citizens.

The information contained within this presentation, MaryTocco.com and the lectures represented are for educational and informational purposes only, and is not intended to be a substitute for medical care and advice. Raising Children Nature's Way

This 3-4 hour, information-packed presentation is the culmination of over 30 years of Mary’s research on the ways to raise children healthy. The latest government study found that 54.1% of American children suffer with a chronic illness, developmental delay or obesity. Without understanding the factors that pose a threat to childhood health and development, it is impossible to protect our families. This knowledge is crucial for parents who want to be sure to protect the health of their children. This presentation examines all of the leading environmental risk factors now affecting this generation of children. Mary will cover:

- Mistakes to avoid prior to conception and during pregnancy
- What parents need to know about genetic sensitivities
- How to avoid the consequences of traumatic birth
- The role of chiropractic and pediatric health
- How to choose the best birth options
- Is breastfeeding worth the hassle?
- How parent’s feeding decisions determine the course of their child’s health and how to introduce food into your child’s diet
- Toxins to avoid in our food, air, water, and home
- The role of chemicals in the decline of health
- The role of natural immune development and normal childhood illnesses
- How to avoid the common autoimmune and neurological problems that have become common in American children
- What you need to know about medicating your child: antibiotics, over-the-counter medicine and psychotropic drugs
- And much more!

All slides are fully-referenced.
Influenza vaccines are now recommended for every infant, adolescent and adult in the country. Healthcare workers are being ordered to take the vaccine or get fired from their job! Pregnant mothers are given the vaccine with no warning that the shot contains Thimerosal, a form of mercury now found in all American influenza vaccines. Is this safe? What are the possible consequences? This presentation covers:

• The “swine flu pandemic” that never happened!
• Influenza politics and world-wide deception
• Influenza vaccine production and the connection to allergies
• Toxic chemicals including Thimerosal: what is a trace?
• What doctors and nurses are reporting from the medical field
• What you can do now in your community to get involved
• Getting an exemption: what are your rights and how to face the challenges ahead

This is a 1 ½ hour, fully referenced presentation highlights the pharmaceutical push to get all Americans in line for the Influenza and many other vaccines being hastily tested and approved. The audience will be astounded to learn the truth about the flu and actual death-rates from years past. We need to stop the deception and take our rights back. The time is now to stand firm and make informed vaccine decisions.

It has been said that “the truth hurts”... but what devastates America is that the truth about health and the most important medical decisions is often surrounded by confusion and is very hard to find. It is indeed, the lack of truth that hurts America the most. Bring Mary to your community and empower your audience as she shares her ultimate message that the Truth Heals!

Mary is an international speaker and leading expert on the topic of vaccines and raising children naturally. Her presentations are based on medical and scientific documentation and are fully referenced. Mary’s 30+ years of research are packed into high-energy presentations that will challenge traditional medical theory and educate people so they can make the most informed health and vaccine decisions.

Mary Tocco is honored to have won the pageant title "America's Outstanding Mom 2013" and proud to represent mothers across the nation. Mary’s platform is Heart For Autism and she is committed to bringing awareness and support to the autism community. Mary’s official sponsor is Avena Originals, a company who provides superior, natural products to support and enhance health.
